

Answer

In my area, there are many persons who perform important duties. They help us to live well. Amena is one of them.

She lives in a slum with her family.

Being a service provider, she works in my family.

She does the cleaning, cooking here. She

reduces my mother's work. Normally, she starts her work at 7 am and finishes at 5 pm.

After reaching our home, she makes breakfast for us. Then she cleans some part of our home.

And then she cooks rice, curry and so on for lunch. At 1 pm, we all together seats for lunch included Amena.

She is satisfied with the job because she can easily express her opinions, problems with us.

During Covid-19 she faced various problems with her family. Her earning was not sufficient for her family.

She also shared with us her problems then. My father financially helped her family. That is how she could manage to overcome those challenges.

I personally get benefit from that lady

As I am also a girl, she likes to gossip with me which gives me more pleasure. Sometimes she makes delicious food for me. That's why I like her so much.

Actually, her job is very important. It is a very tough and risky job as well. We, all are thankful for her contribution to our life.
